PORTFOLIO

JenniferKral.com

SUMMARY

Driven professional experienced in creating full-stack web applications seeking a Web Developer position in an environment that continually embraces new technologies and fosters innovative ideas.

EDUCATION

Full-Stack Web Development Certificate

2018 *University of Minnesota, Minneapolis, MN*

- Graduate of an intensive coding bootcamp based out of University of Minnesota College of Continuing Education involving in-class teaching through an extensive curriculum using JavaScript, Node.js, Express.js, jQuery, AJAX, REST APIs, React, MySQL, and Mongo DB.
- Worked individually and with teams to develop several full-stack web applications

Bachelor of Arts Biology

2016 *University of Minnesota, Minneapolis, MN*

EXPERIENCE

QA and Committee Assistant

University of Minnesota Clinical Trials Office

Nov 2017 - Present
Minneapolis, MN

- Assist the Data Safety and Monitoring Council (DSMC) with review of clinical trial data to ensure the safety of patients and integrity of clinical trial data
- Form reports and conduct data analysis via QlikView and Excel on all clinical data including serious adverse events, accrual, study status changes, and monitoring visit findings
- Co-manage the Cancer Protocol Review Committee (CPRC) which oversees all new and ongoing university clinical research trials to ensure scientific merit, evaluate trial progress, process protocol amendments, and determine resource allocation
- Correspond with Principal Investigators and other study staff regarding trial management
- Prepare all reports for and attend monthly DSMC meetings and bimonthly CPRC meetings to review clinical trials and record committee decisions

Claims Specialist

Park Nicollet Health Services

Aug 2016 - Jul 2017
Minneapolis, MN

- Ensure accuracy of provider billing information submitted on health insurance claims
- Problem solve a large volume of claim denials to recover reimbursement from third party payers (e.g. Blue Cross, Medicare)
- Consistently meet and exceed project deadlines for high-volume work-queues
- Perform data analysis on healthcare claims via Excel to create monthly project deadlines for the post-adjudication team
- Provide customer service regarding patient account balances and insurance billing
- Decreased volume of a queue by 30% after developing an updated invoice deferral system

Pharmacy Technician

Walgreens Pharmacy

Nov 2015 – July 2016
Eagan, MN

- Work closely with pharmacists and technicians to accurately and efficiently dispense prescriptions in a high-volume pharmacy (500+ RX/day)
- Verify health insurance eligibility and resolve complex insurance rejections
- Provide excellent customer service to patients and healthcare providers
- Perform data entry of prescriptions by computer

Cancer Research Assistant

University of Minnesota Masonic Cancer Center

Mar 2013 – Mar 2014
Minneapolis, MN

- Collaborate on a biology research project to study the role of p53 gene knockouts in the development of small cell lung cancer in mice models
- Perform laboratory tests to produce data to support scientific investigations
- Troubleshoot and revise experimental techniques as needed
